

Nautanen, the old mining village!

Join me on a guided tour, we are walking around in beautiful nature and feel the wings of history.

Close to Gällivare center is the former mining community Nautanen. The copper deposit in Nautanen was discovered in 1898. The mining operations were conducted between the years 1902-1908. An entire mining community grew up there with mines, an industrial area and also an entire community for the workers.

Today you can see the foundations of the house after the community with school, cableway and baths and the remains of the copper mine from of the 20th century. The area has a great cultural-historical value.

Time required 2-3 hours

Price 525 Skr / person including guide, coffe and transportation
