Visit LKAB's underground iron-ore mine in Malmberget

Every day, 365 days a year, iron ore is mined in LKAB's mines that correspond to around six Eiffel Tower - calculated in the amount of steel.

Visit LKAB's underground iron-ore mine in Malmberget and get an insight into one of Sweden's most important industries. At LKAB's research and visitor center, the entire mining process is presented before the journey by minibus goes 1000 meters underground. On this mining tour, you will come straight down and right into the production. The guide will talk about modern mining and how it can cause a whole town to be moved. The mining tour is held both in Swedish and English.

- **Starting- and end point:** Gällivare Touristcenter/Railwaystation
- **Price, adult** 400 SEK/person, **youth and student** 300 SEK/person

LKAB is responsible for safety during the mining tours and has accident insurance that covers visitors. However, it does not cover damage to private property during the visit. The times for the mining tours are determined by Karin Niva Event & Support and can be changed or canceled without prior notice. Force majeure; neither LKAB nor Karin Niva Event & Support is liable for damage due to government action, war, riots, general shortage of means of transport, general shortage of goods, labor market conflict or any other event beyond the companies' control. In such a situation, LKAB and Karin Niva Event & Support shall do everything in their power to limit the operational and financial consequences.

Good to know before the mining tour

- ✓ Visitors must be fluent in either Swedish or English and be able to identify themselves
- ✓ LKAB equips visitors with suitable protective clothing
- ✓ The temperature in the mine is always between 8-18 degrees Celsius
